Upcoming Webinar: Formtek Extensions for Alfresco

On March 27, 2012, Dick Weisinger, Formtek's Vice President and Chief Technologist, will present a webinar, sponsored by Alfresco, entitled: *Formtek Software Extensions for Alfresco***.**

Formtek has five extensions available for installation on Alfresco. These extensions improve the functionality within Alfresco and satisfy the use cases for many Alfresco implementations.

- **The Formtek Auditing Extension** provides a complete audit log for every file and folder within Alfresco.

- **The Formtek File Linking Extension** allows a single document stored in Alfresco to be accessible from multiple locations without physically duplicating the document.

- **The Formtek Peer Association Extension** makes it possible for associations to be established between documents within Alfresco Share.

- **The Formtek Security Extension** offers more flexible security capabilities in addition to those available with standard Alfresco Share.

- **The Formtek Version Browser Extension** allows the user to select any older document version in Alfresco Share and view its Web preview and associated metadata, or download that version.

To register for this event, visit Alfresco's registration page.

For additional information about Formtek's Extensions for Alfresco, download the product data sheet or contact: sales@formtek.com.
