

## ABOUT FORMTEK

### HIGHLIGHTS

- Ensure data integrity through robust security and access control**
- Increase productivity through collaboration and process automation**
- Allow users to quickly search for and retrieve all types of content**
- Make the right content available to the right users at the right time**
- Scale and adapt quickly to changing needs**
- Manage all engineering documents, drawings, and AutoCAD files**
- Implement records management to facilitate compliance with corporate policies and Government regulations**
- Migrate from old and difficult content management systems to a modern architecture**

**Formtek provides Content Management software and services** to engineering, manufacturing, aerospace, and other markets. Our capabilities and experience, particularly in the areas of content repository services, document management, and engineering drawing management have helped both small organizations as well as large global enterprises manage their most important information assets.

**Formtek solutions** are built on technology platforms that are open and adaptable to complex IT environments. Our strength is in understanding the complex requirements of managing content within sophisticated operations, and delivering secure and stable solutions to support those requirements.

**Formtek's Content Repository Services software technology – Formtek | Orion** - aggregates and organizes all data within an organization, regardless of source, and creates a virtual vault with a very high level of system control, security, scalability, and reliability. The Formtek | Orion Software Development Kit (SDK) provides extensive capabilities for implementing a transparent and flexible content repository capability throughout an organization that allows users to connect with relevant information regardless of application or method used.

**Commencing in 2007, Formtek became an Alfresco Partner.** The Alfresco Digital Business

Platform is an open, modern, secure platform that is easy to build on, integrate and extend. It intelligently activates process and content throughout the enterprise. Alfresco provides the fastest path for people to interact with information and for companies to respond to changing business needs.

Formtek provides Alfresco software, implementation services, front-line support, as well as extensions to Alfresco including the **Formtek EDM (Engineering Data Management) Solution** for Alfresco.

In October 2020, Alfresco was acquired by Hyland Software, and **Formtek became a Hyland Authorized Solution Partner.** Hyland provides enterprise content services and management to organizations across the globe.

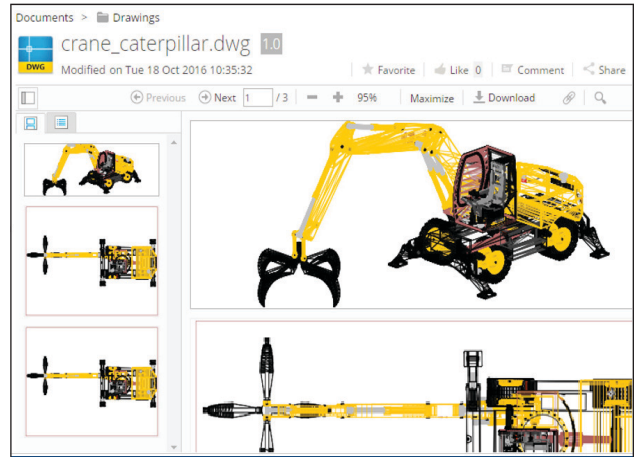

**Formtek's Professional Services** organization offers a flexible approach to ECM solution delivery that is customer-focused and tailored to your specific business needs. Our services include requirements definition, legacy system migration, software customization and integration, documentation, training, and project management.

The **Formtek Support** team provides clients with personalized and rapid response to maintenance issues and questions. The Formtek Online Support Portal allows clients to download software and submit support tickets.

# Formtek Products for Alfresco

**Formtek's EDM (Engineering Data Management Solution)** works in conjunction with Alfresco Content Services (ACS) to provide flexible yet secure management of vital engineering documents and drawings. Formtek EDM provides a set of server-based extensions to the Alfresco repository and Alfresco Share. Upon upload to Alfresco, AutoCAD, MicroStation, and IFC files are transformed for viewing in Alfresco, and text and attributes are extracted. Capabilities include custom content types and properties for engineering drawings and documents, and the ability to automatically manage and associate AutoCAD and MicroStation reference files within the repository.

The **Formtek EDM Connector for AutoCAD** product is an AutoCAD plugin that allows synchronized interaction between the AutoCAD application and the Alfresco repository.

**Formtek Rendering of CAD file within Alfresco**

**The Formtek Auditing Extension**

The **Formtek EDM Module Plugin for ACA/ADW** provides a set of EDM extensions for the Alfresco ADF-based Alfresco Content Application (ACA) and Alfresco Digital Workspace (ADW), similar to the Alfresco Share extensions included in the EDM Module.

The **Formtek Extensions for Alfresco** are designed to increase the capabilities and productivity of your Alfresco implementation.

- **Auditing** provides a complete audit log for every file and folder within Alfresco. The Extension is integrated within the Alfresco Share interface and, when selected, displays the audit log for a file or folder, including the action performed, the date and time the action occurred, and the user that performed the action.
- **File Linking** allows a single document stored in Alfresco to be accessible from multiple locations without physically duplicating the document.
- **Peer Association** makes it possible for associations to be established between documents within Alfresco Share.
- **Version Browser** allows a user to select and view any older document version in Alfresco Share, or download that version.

## ABOUT FORMTEK

For over two decades, Formtek has been providing mission-critical IT software and services to some of the most demanding engineering, manufacturing, aerospace, industrial, and technical organizations in the world. We build products and solutions for content management platforms that are open and adaptable to complex IT environments, including Formtek | Orion Content Repository Services and the Alfresco Digital Business Platform. Our software application solutions also include the Formtek Engineering Data Management (EDM) Solution for Alfresco.
